HIRS:

Human Impact Recognition System

A holistic employee recognition architecture for Intuit

Spotlight

Strengths & Weaknesses

What Spotlight Did Well

01

Fast peer-to-peer recognition

Enabled quick appreciation across teams and geographies.

02

High inclusivity and scale

Allowed anyone to recognize anyone at any time.

03

Built cultural visibility

Created shared understanding of values through digital stories.

04

Strengthened informal collaboration

Encouraged helping behavior across departments.

Where Spotlight Broke Down

01

Inconsistent & Confusing Award Practices

Managers lacked clarity on appropriate award amounts, leading to uneven, arbitrary recognition decisions.

02

Weak Governance & Misaligned Recognition

Awards were sometimes given despite poor core performance, with no approval checks or cross-team oversight.

03

Expectation Gap & Low Visibility

Younger employees desired empathetic, continuous feedback, but less than 40% of awards were publicly recognized.

04

Misuse of Spotlight Platform

Some sales teams used Spotlight as a contest proxy, diluting its purpose as a recognition tool.

Executive Summary

The HIRS Architecture

01 Two-part unified model

Combines performance impact and personal moments into one framework.

02 SIR module enhances equity

Standardized scoring prevents bias and guesswork across managers

03 HMR module strengthens belonging

Life events and micro-wins create emotional resonance and trust.

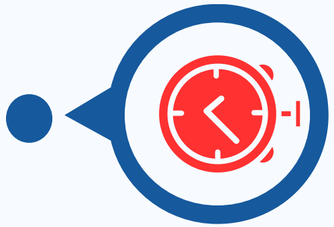
04 Solves all Spotlight gaps

Addresses inequity, confusion, low visibility, mixed signals, generational needs.

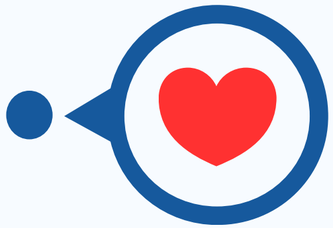
05 Global benchmark aligned

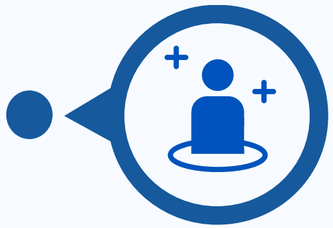
Reflects best practices from Google, Deloitte, P&G, Salesforce.

Strategic Impact Recognition Module



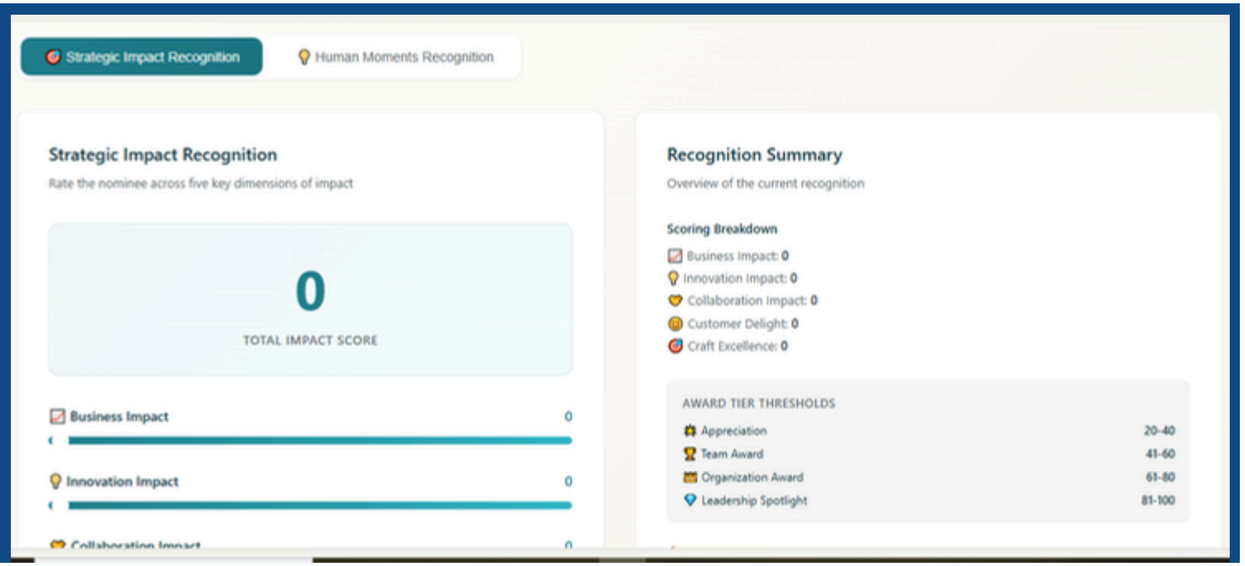
Human Moments Recognition Module





HIRS

Module 1: SIR- Strategic Impact Recognition



100-point impact score

Five weighted dimensions quantify contribution fairly.

Equity award bands

Automatic tiers remove confusion about award size.

Manager intercept loop

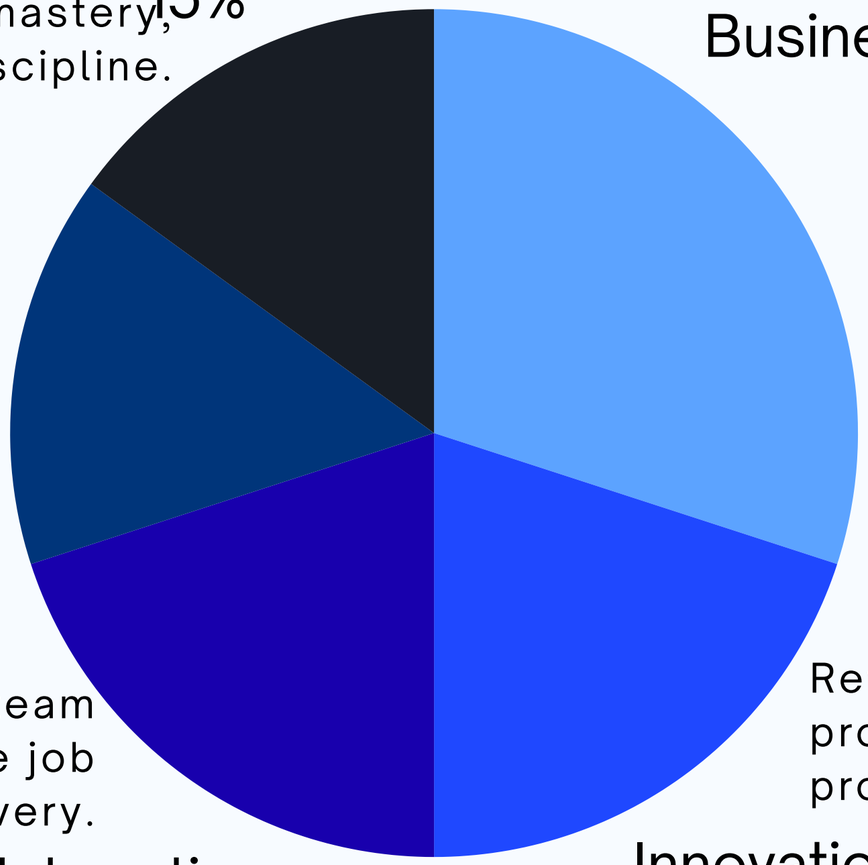
Ensures nominations align with role performance.

Visibility nudges

System reminders increase public recognition behaviors.

SIR: Impact Score Framework

Five-Dimension Impact Scoring



Craft Excellence 15%
Focuses on quality, mastery, reliability and execution discipline.

Business Impact 30%
Measures contribution to revenue, savings, efficiency or measurable metrics.

Customer Delight 15%
Recognizes work improving CSAT, NPS, or customer experience moments.

Innovation 20%
Rewards experimentation, prototypes, new ideas improving product or process.

Collaboration 20%
Acknowledges cross-team support balanced with core job delivery.

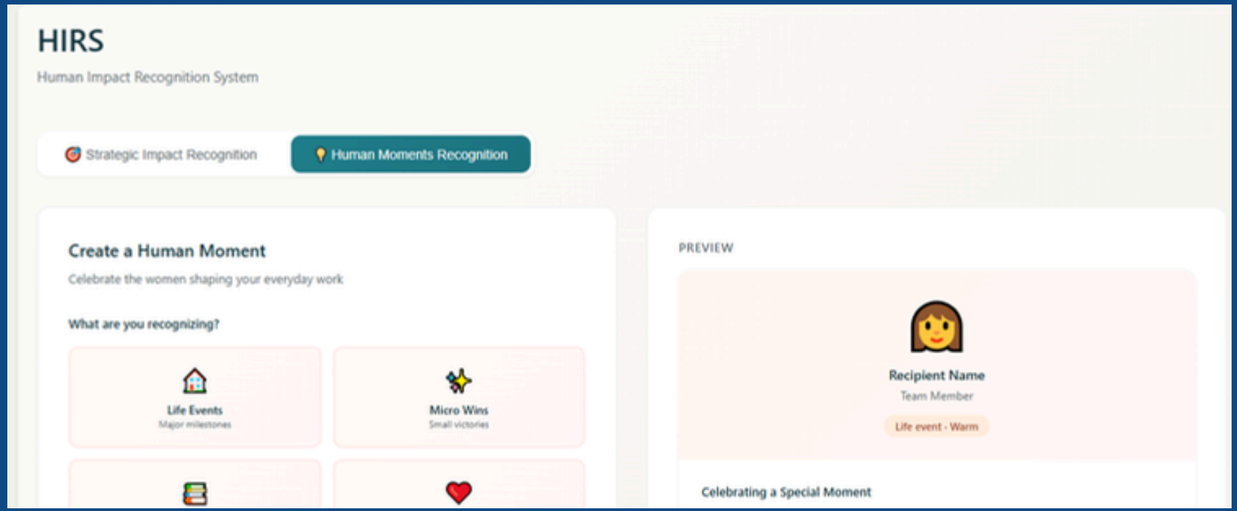
HIRS

Module 2: HMR- Human Moments Recognition



Life-event recognition

Celebrations for parenthood, marriage, health, achievements, transitions.

Micro-wins & gratitude

Quick notes for daily wins, effort, teamwork, kindness.

Learning milestones

Recognizes completed courses, certifications, new skills.

Values stories wall

Showcases employee stories living Intuit's core values.

Global Recognition Systems Supporting HIRS

Google gThanks

Real-time budget visibility + public recognition feed to increase transparency and peer visibility.

Increased peer-sharing by 33%, improved team gratitude behaviors.

Microsoft Kudos

Microsoft

Guided recognition prompts that help managers write consistent, high-quality appreciation messages.

Boosted collaboration scores by 21% across product teams.

Deloitte Moments that Matter

Deloitte.

Life-event & milestone recognition stream that celebrates personal and professional “moments that matter.

24% uplift in belonging through moments-that-matter approach.

P&G and WorkHuman

P&G

Impact-tiered award logic with built-in fairness controls to ensure equitable, data-aligned award levels.

Delivered $52M productivity gains via structured recognition.

Sources : WorkHuman, Gallup

HIRS Success Metrics & Implementation Roadmap

:KPIs & Expected Outcomes

80% manager adoption

Monthly SIR usage ensuring equity and consistency.

50% more visibility

Increased public sharing through nudges and rituals.

10% attrition reduction

Stronger commitment through consistent recognition.

20% higher impact awards

Better targeting of meaningful contributions.

:Phased Rollout Plan

Foundation (0–3 months)

Launch SIR scoring, equity bands, intercept, training

Human Layer (3–6 months)

Introduce HMR, life events, micro-wins, visibility nudges.

Analytics (6–12 months)

Deploy dashboards, equity monitoring, flight-risk alerts.

Culture Integration (Annual)

Ritualization of recognition weeks, story walls, value ceremonies.

Anticipated Objections & Mitigations

Objection 01

"Scoring feels complex."
— "Slider UI reduces scoring to under 20 seconds."

Objection 04

"Managers remain biased."
— "Calibration + bands reduce variance by 50%."

Objection 02

"Noise from micro-wins."
— "Rate limits ensure meaningful recognition only."

Objective 03

"Employees may want larger awards."
— "Transparent impact scoring justifies award amounts."
